SUMMARY

Backend engineer working in Java and Spring Boot. I build REST APIs and microservices on PostgreSQL, using Spring Security for auth, Kafka for service-to-service events, and Docker to run it all locally. Comfortable on the frontend in React and Next.js when a service needs one.

TECHNICAL SKILLS

Languages: Java (8–21), SQL, JavaScript, TypeScript, C++

Core Java: OOP, Collections, Generics, Streams and Lambdas, Multithreading and Concurrency, Exception Handling, JVM Internals, Garbage Collection, SOLID

Spring: Spring Boot, Spring MVC, Spring Security (JWT), Spring Data JPA, Hibernate, Spring Cloud Gateway, Spring Kafka, Bean Validation, Flyway, Maven, JUnit 5, Mockito

Backend: REST APIs, Microservices, Event-Driven Architecture, Apache Kafka, API Gateway, Caching, Rate Limiting, System Design, Node.js, Express.js

Databases: PostgreSQL, MySQL, MongoDB, Redis. Schema design, indexing, transactions, query optimization

Cloud and DevOps: AWS (EC2, S3, RDS, IAM, CloudWatch), Docker, Docker Compose, GitHub Actions, CI/CD, Linux

Frontend: React.js, Next.js (App Router, SSR/SSG), Redux Toolkit, Tailwind CSS, shadcn/ui

CS Fundamentals: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks

Practices: Agile/Scrum, TDD, Code Review, Git, Postman, OpenAPI/Swagger

WORK EXPERIENCE

Fitreak

Jun 2026 - Present

Software Development Engineer, Full-Stack

Remote

- Integrated the storefront with a Java and Spring Boot commerce backend on MySQL and Redis, consuming its REST endpoints and configuring service-to-service networking across Docker Compose containers.
- Leading the storefront migration from Shopify to a custom Next.js 14 app, rebuilding catalog, cart, and checkout to remove platform lock-in.
- Cut initial bundle size by 28% using route-based code splitting and image optimization, improving Core Web Vitals on the highest-traffic pages.
- Owned the product redesign in Figma and built a reusable component library now used across the storefront.

Vartagram

Jun 2025 - Sep 2025

Software Development Engineer Intern, Full-Stack

Remote

- Optimized 3 high-traffic PostgreSQL endpoints by adding composite indexes and eliminating N+1 queries, reducing API latency by 30%.
- Fixed 2 REST API performance bottlenecks found during code review.
- Shipped 6 mobile-first PWA features in React and Next.js across 3 Agile sprints.

PROJECTS

SplitExpense, Expense-Sharing Platform (Java Microservices)

github.com/VikramSinghRakwal06/split-expense

- Tech Stack:** Java 21, Spring Boot, Spring Cloud Gateway, Spring Security (JWT), Spring Data JPA, Apache Kafka, PostgreSQL, Redis, Flyway, Docker Compose, Next.js
- Built a Splitwise-style app as 5 Spring Boot microservices (gateway, auth, group, expense, notification), each with its own PostgreSQL database.
- Made Spring Cloud Gateway the single public entry point, handling JWT validation, routing, and Redis-backed rate limiting; auth-service issues access and refresh tokens.
- Implemented equal, exact, percentage, and weighted splits, plus settle-up with partial payments, publishing each balance change to Kafka as a domain event.
- Kept notifications out of the request path with a Kafka consumer service, cached balance reads in Redis, and set up one-command Docker Compose bring-up with Flyway migrations and Swagger docs.

Synapse, Real-Time Chat and Video Platform

synapse-phi-one.vercel.app | github.com/VikramSinghRakwal06/synapse

- Tech Stack:** React.js, Node.js, MongoDB, Socket.io, WebRTC, JWT, Docker
- Built real-time messaging over Socket.io and peer-to-peer video calling with WebRTC using STUN/TURN servers for NAT traversal.
- Secured sessions with JWT and automated deployment through a GitHub Actions pipeline.

Expense Tracker, Spend Analytics Dashboard

github.com/VikramSinghRakwal06/ExpenseTracker

- Tech Stack:** React.js, Node.js, MongoDB, Recharts
- Built APIs using MongoDB aggregation pipelines to power category-wise spend analytics, budgeting, and charts over a normalized transaction model.

EDUCATION

Bharati Vidyapeeth Deemed University, Pune | Jun 2026

B.Tech, Computer Science and Business Systems, CGPA: 9.07 / 10.0

Ajanta Higher Secondary School | 2022

HSC, Physics Chemistry Mathematics, 95.6%

ACHIEVEMENTS AND LEADERSHIP

- 1st place, Smart India Hackathon 2024 college round (50+ teams); 1st place, Zero Errors Zone debugging competition.
- Solved 500+ data structures and algorithms problems on LeetCode, NeetCode, and GeeksforGeeks.
- Deputy Joint Secretary, CSBS Student Association, BVDU; led logistics for 2 events with 500+ participants.
- Contributed documentation fixes to awesome-react and awesome-nodejs (50k+ stars each).
